TAKE BACK WHAT IS YOURS

START UP PRACTICES

IDS specializes in helping dentists who are starting their own practices, or starting as an associate, by offering extensive services in credentialing, EFT/ERA enrollment, and setting up the top fee schedules. Our goal is for you to succeed and we will be by your side every step of the way!

HOW IT WORKS ::

Through an analysis of your new practice, IDS will help you select the insurance codes that will produce the most revenue, assist you in understanding and determining the best way to be contracted, set you up in a competitive market by comparing other fees in your area and researching which insurance companies are being utilized by the primary employers, and we will save you a great amount of time and paperwork by handling the credentialing process for you, quickly and efficiently, all resulting in a greater return on your investment.

DID YOU KNOW ::

That 90% of your revenue will come from your top ten codes?

Setting up the fees for those codes is a very important part of your start up, because those fees will determine your revenue. We use a third party fee analysis based on your zip code and do extensive research in your area to make sure you are as competitive as you need to be with your fees and we do thorough research on employers in your area so we know who to focus your PPOs on.

BOTTOM LINE ::

Dental school and starting your own practice are both costly investments. Hiring IDS to get you the top fee schedules with PPOs will help you pay off your loans and make your practice more profitable.

LET US NEGOTIATE FOR YOU!
